

EOTS Testing Facility  
ASML 5500 /500 Scanner  
and 5500 /60 Stepper

# EOTS Testing Facility

# ASML 5500 /500 Scanner and 5500 /60 Stepper

- EOTS has built test rigs to refurbish ASML parts
- After the part has passed all test-rig parameters it is installed on an ASML /500 scanner or /60 stepper to verify full-functionality
- The ability to fully simulate the operational environment results in the confident repair of all equipment to ASML specifications
- This method results in minimal DOA and ensures quality repair/rebuilds
